INVESTMENT INCENTIVES AVAILABLE IN BAUCHI STATE.

Bauchi Investment Corporation Limited in the process of her business research discovered that; Incentives have the immense ability to create value, de-risk investments and improve the competitiveness of value chains within the economy that yield premium net benefits to the State economy and the society.

Incentives aim at addressing market failures that prevent or delay the transition towards circular products, services and solutions. They do play a crucial role towards mitigating negative externalities, steering markets towards sustainability and driving beneficial behavioral changes. Incentives do also have the ability to improve the competitiveness of the value chains that bring immense environmental benefits when compared with linear economies. Also, incentives speed up the transition towards a circular economy at national, regional and local levels as they remedially target different market failures or barriers. Their implementation therefore varies inherently according to type, based on their associated costs, infrastructure, sustainability and scope. The accompanying table provides details of Investment Incentives that are available in Bauchi State.

Thank you.
